

Occupational Therapist (OT) for Multi-Disciplinary Therapy Practice

The Lark Center for Therapeutic Play and Learning

Norwood, MA

Job Type: Part-Time, Fee-For-Service (Possibility to grow to full time)

Pay: \$60-75/session (DOE)

The Lark Center is a pediatric therapy practice located in the heart of Norwood center, which opened in January 2022. The clinical team consists of occupational therapists, speech therapists, social workers, educators, and other clinicians who are passionate about our mission to bring fun, holistic and accessible therapy to the children in our community. Our clients enjoy our welcoming, supportive and family-centric atmosphere. At The Lark Center, we are proudly neurodiversity-affirming. We look forward to adding your skills of interpersonal communication, empathy, problem-solving, and professionalism to our team. Benefits include flexible schedule, competitive pay, mentoring/training, and a great team of clinicians to support you. Health insurance available for full-time employees, professional development and wellness benefits available to all staff.

Responsibilities:

- Deliver high quality occupational therapy in individual or small group sessions.
- Participate in multidisciplinary intakes, evaluations and re-evaluations using a strengths-based, neurodiversity-affirming approach.
- Document sessions clearly and accurately using our practice software.
- Communicate effectively and respectfully with families and other providers.
- Ensure clients' confidentiality, dignity, and safety at all times.
- Maintain professional licensure and adhere to all professional practice standards.
- Provide supervision to fieldwork students, therapy assistants and aides as needed.
- Attend and participate in staff meetings and trainings.
- Carry professional liability insurance. *Recommended, but not required.

Qualifications:

- Master's degree from an AOTA accredited occupational therapy program.
- At least 2 years of experience working in a pediatric setting.
- Ability to work independently and with multi-/trans-disciplinary teams.
- Experience with neurodivergent children and teens.
- Deep understanding of sensory processing.
- Prior experience in private practice is preferred.
- Experience with feeding therapy, vision therapy, and/or reflex integration is a PLUS!
- Familiarity with electronic medical records is a plus.
